

Scrum Principles

- 1. Increment**
Deliver value every short cycle of month or less (Sprint).
- 2. Context**
Your context matters, so build up your own process.
- 3. Transparency**
Ensuring Transparency is cheaper than enforcing control.
- 4. Empiricism**
Inspect and Adapt frequently (every day and every Sprint) to head the right direction.
- 5. Self-organization**
Team knows how to do it, let the team decide.
- 6. Collaboration**
Team is more than a sum of individuals.
- 7. Product Owner**
One person deciding on direction helps in Optimizing Value.
- 8. Scrum Master**
One person supporting the system makes everything go smoother
- 9. Focus**
Limiting work in progress, setting time boxes for planned work and removing distractions let you focus
- 10. Experiments**
Every Sprint try something different.
